**BOULDER CITY** – Boulder City's new Public Works Director, Keegan Littrell, starts in his new role today after an exhaustive months-long search of highly qualified candidates.

Littrell has more than 12 years of progressive engineering experience and more than a decade of lead-design engineer experience. He has overseen a department with a \$15.5 million operating budget and implemented an \$8.9 million capital improvement program.

“Public Works Director is a critical position for the City and it became quickly evident that we had found a skilled professional and a true asset for our team,” said Al Noyola, City Manager. “Keegan starts today in Boulder City having proven he has the skills to lead our Public Works Department and continue the great efforts of the hard working men and women we have here.”

Littrell earned a Bachelor's degree in Civil Engineering from Montana State University. He is a licensed Professional Engineer in Arizona and California. He has experience in all aspects of Public Works including administration, engineering, street maintenance, fleet services and facilities. He also has experience in storm drainage, water and wastewater projects.

“I am excited to join the Boulder City Public Works Department and this dedicated group of city employees,” Littrell said. “Boulder City is an incredible community and I am committed to ensure the Department delivers projects and services in an efficient manner that addresses the needs of the community.”

Littrell comes to Boulder City after working as the Public Works Director and City Engineer in Bullhead City, AZ.
