Obstruction Application

Website: www.bcnv.org/221

Instructions: 1) Complete All Sections 2) **Permit only for 7 Days** 3) Fees located www.bcnv.org/275/Fees

Submit: 1) Email To: pwengineering@bcnv.org 2) **Permits may take 24 hours to process**

Incomplete Submittals Cannot Be Processed

With payment of this permit, I hereby certify that I am the OWNER or duly authorized representative of the resident/business whose name appears on this application and I am fully authorized to bind the owner in executing this application. I also certify the obstruction/encroachment will be made in accordance with Chapter 15 of the City Code of Boulder City. I agree to maintain the obstruction area, keeping it safe, clean and in good repair including dumpsters, pods, building and landscape materials, etc. I also agree to maintain a minimum walkway width of 48-inches upon public sidewalk, including clearance at all ramps, crossings and doorways and a 24-inch minimum from edge of curb to project. **STOP! Download/File-Save As this form before filling in the information and submitting it to pwengineering@bcnv.org.**

ENGINEERING DIVISION NOTES

The permittee shall not make or install any improvements, obstructions, or structures that create a violation of law under the Americans with Disabilities Act. A 48" wide minimum walkway clearance is required. Failure to insure proper clearance can result in revocation of permit.

RELEASE

With payment of this permit, the permittee agrees to and shall release the City, its agents, employees, officers, and legal representatives (collectively the "City") from all liability for injury, death, damage, or loss to persons or property sustained in connection with or incidental to performance under the permit, even if the injury, death, damage, or loss is caused by the City's actual or alleged joint or concurrent negligence and/or the City's strict products liability or strict statutory liability.

The Public Works Department mission is to improve the lives of Boulder City citizens through the infrastructure we provide and maintain each day and the Capital Improvement Projects that strengthen the community into the future

Traffic Control Setup Required by Code:

9-1-8. - TRAFFIC PROTECTION AND CONTROL.

- A. *Barriers And Warning Devices.* It shall be the duty of every person cutting or making an excavation in or upon any public place, or placing an obstruction upon any public place, to place and maintain barriers and warning devices necessary for safety of the general public.
- B. *Conformance With Traffic Code.* Barriers, warning signs, lights, etc., shall conform to the requirements of the City Traffic Code and the administrative authority. Warning lights shall be electric torches, electric lanterns, electric markers or flashers used to indicate hazard to traffic from sunset of each day to sunrise of the next day. Warning devices illuminated with open flame lanterns, torches or flares shall be prohibited.
- C. *Markers And Flashers; Light Sources.* Electric markers or flashers shall emit light, amber in color, at sufficient intensity to be visible at a reasonable distance for safety. Flashing lights shall flash at a rate such that the interval the light is on is approximately one-half (½) of the on-off cycle length. Reflectors or reflecting material may be used to supplement, but not replace, light sources.
- D. *Maintain Normal Traffic Conditions.* The permittee shall take appropriate measures to assure that during the obstruction or the performance of the excavation work, traffic conditions as near normal as possible shall be maintained at all times so as to minimize inconvenience to the occupants of the adjoining property and to the general public.
- E. *Closing Of Streets.* When traffic conditions permit, the administrative authority may, by written approval, separate from the excavation or obstruction permit, permit the closing of streets and alleys to all traffic for a period time prescribed by him, if in his opinion it is necessary. The written approval of the administrative authority shall require that the permittee give notification to various public agencies and to the general public. In such cases, such written approval shall not be valid until such notice is given.
- F. *Safe Crossings Required.* The permittee shall maintain safe crossings for two (2) lanes of vehicle traffic at all street intersections where possible and safe street crossings for pedestrians at intervals of not more than three hundred feet (300'). If any excavation is made across any public street, alley or sidewalk adequate crossing shall be maintained for vehicles and for pedestrians. If the street is not wide enough to hold the excavated material without using part of the adjacent sidewalk, a passageway at least one-half (½) of the sidewalk width shall be maintained along such sidewalk line.
- G. *Placement Of Warning Signs.* Warning signs shall be placed far enough in advance of the construction operation to alert traffic within a public street. Excavations and obstructions in public places shall be properly protected by barricade and/or flagman methods as provided under the City Traffic Code. Any person maintaining improper barricades within street right of way which require the placing of additional barricades, warning lights or signs by the City in the interest of public safety shall be charged fifty dollars (\$50.00) for each occasion in which the City finds it necessary to place the barricades.
